FOR IMMEDIATE RELEASE

Executive Management Services, Inc. Awarded Prestigious LEED Gold Certification

Indianapolis, IN -- Executive Management Services, Inc. ("EMS") is pleased to announce that it has been awarded LEED Gold certification, for the renovation of their new corporate headquarters. The LEED (Leadership in Energy and Environmental Design) rating system, developed by the U.S. Green Building Council (USGBC), is the foremost program for buildings, homes and communities that are designed, constructed, maintained and operated for improved environmental and human health performance.

EMS achieved LEED certification for implementing practical and measurable strategies and solutions aimed at achieving high performance in: sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality.

"Achieving LEED certification is more than implementing sustainable practices. It represents a commitment to making the world a better place and influencing others to do better," said Mahesh Ramanujam, president and CEO, USGBC. "Given the extraordinary importance of climate protection and the central role of the building industry in that effort, EMS demonstrates their leadership through their LEED certification of Gold."
